### Unley businesses are addressing Climate Change

#### Unley: Sustainable Business Communities

Small businesses participating in the Unley: Sustainable Business Communities Program have joined up with lighting partners Globebusters and Eco Bright Energy Solutions to showcase energy efficient lighting options. This lighting retrofit included the installation of devices which allow the use of more efficient fluorescent tubes in traditional 36W fittings (T8 → T5 Adaptors).

|                             |       |                 |
|-----------------------------|-------|-----------------|
| Café Paradiso               | 150a  | King William Rd |
| Frangipani Studio           | 109a  | Goodwood Rd     |
| Goodwood Shoex              | 2/109 | Goodwood Rd     |
| Number 96                   | 96    | Goodwood Rd     |
| The Physio Studio           | 132   | Goodwood Rd     |
| The Waste Not Want Not Shop | 107   | Goodwood Rd     |

#### **Below is a snapshot of what participating businesses had to say about the new lighting**

Lights from Globebuster are Brighter (**Steven – Frangapani**)

Same appearance of light, while using less energy. (**Danica – Number 96**)

Tried some in the store and impressed with the new lights. “very pleased with them’ Had the most energy saving fluros he could find already in the store, but quite happy to go on further with energy saving and installing ‘Save-it-easy’ - “the light they give is good, colour good for display”

(**Simon – Goodwood Shoex**)

## Background Information

### GLOBEBUSTERS

Globbusters are a company that looks after lighting and professional lighting maintenance for many businesses in Adelaide. The website is:  
<http://www.globbusters.com.au/>

"Globbusters has been looking after lighting maintenance for retailers and businesses across Adelaide for 5 years. With over 500 customers the 'no call out fee - no installation fee' service has proven to be extremely popular, together with advice on better lighting choices and more energy efficient globes. Globbusters aims to keep its customers informed and up to date about the latest trends and developments in lighting, and to this end is very keen to play a part in introducing the new T8 --> T5 energy saving fluoro conversion kits to local businesses. #1 With a number of other energy saving lighting products coming to market, retail and workspace lighting as we know it will certainly be undergoing a radical change as the focus towards reducing the impact of lighting on the environment gains pace."
