

## Fitting *Save-It-Easy*®

**1**

**2**

**3**

### **DESCRIPTION OF BULLETIN UPDATE**

Fitting the *Save It Easy*® in-line T5 adaptor is a simple three step process:

**Step 1:** Ensure the T5 lamp is fitted properly into the *Save It Easy*® electronic ballast and end piece. It is good practice to ensure the lamp's branded end is fitted into the *Save It Easy*® electronic ballast (the larger section). The small droplet of mercury in the T5 lamp is positioned at the branded end of the lamp - fitting the lamp this way will minimise any initial startup issues.

**Step 2:** Remove the existing T8 lamp and the old starter and replace it with the *Save It Easy*® green starter piece.

**Step 3:** Position the assembled T5 lamp and *Save It Easy*® adaptor into the luminaire and ensure it is securely fitted.

Although fitting your new T5 lamps adapted with the *Save It Easy*® electronic ballast does not require an electrician, always ensure you are aware of safe working methods before attempting any lamp change.

Enjoy your new flicker free T5 lighting!
